[FOR ADDRESS ONLY.]

The Norman Tower is an elaborate structure of oolite stone which connects the Upper and Lower College Green. It is the only remaining principal gate of the monastery founded by Robert Fitzhardinge in 1142. The superstructure is Perpendicular work, and contains statues of Abbots Newland and Elliott, the gateway also displaying the arms of England and of Berkeley, with their quarterings. It was carefully restored in 1886.

14/4/14.

Shall be pleased to exchange views with you.
